Acceleration Award

Congratulations on winning the Acceleration Award as part of the Next Generation City Action 2023 initiative! This document serves as a clarification on how this award can be used and a form for you to complete with the information needed to transfer the award to your team.

The purpose and use of the Acceleration Award:

The Acceleration Award is sponsored by the company/city/organisation representing the challenge your team worked with as part of the Next Generation City Action 2023 initiative. This means that your team has been awarded 1.000 EUR to finance a further acceleration of your project idea. It is up to you and your team members how you will spend the 1.000 EUR for this purpose. We advise that you use it to finance the further development of the idea by i.e. enabling further testing (lab, real life), prototyping, showcasing (i.e. attending a client meeting, inviting for a workshop, joining an event) or communication purposes (for larger feedback, exposure etc.). The decision can be made by matching the development stage of your idea, the interests and drive of your team or team members, an identified opportunity, feedback or interaction with your challenge representatives or advice from professors at your university.

Please insert a few sentences below on how you and your team's idea(s) plan to make use of the award to accelerate the idea further:

The administration of the Acceleration Award

1. DTU Skylab transfer the funds to the team representative you list below.
2. Inform DTU Skylab in case you have not received the transfer within 35 days of completing the below information.
3. It is the responsibility of the team members that the money is not spent on personal gains but with the purpose and intention to accelerate the team idea/solution developed as part of Next Generation City Action.
4. The team member receiving the funds is responsible for checking if they are subject to report/pay tax of the award in their own home country. If subject to tax, the team will have the remaining funds available after tax, to use for acceleration purposes. Students on exchange or with residence in Denmark must report the award to the tax authorities.
5. The award is not a personal award that each team member is entitled to receive a share of but should be directed toward further development and learning related to the idea developed. If any team member is no longer part of, or is interested in, further developing the idea, then these team members will not take part in administering and deciding the use of the acceleration award.
6. Transfer will be in EUR and thus subject to national currency conversion.

Reporting

After signing this document, DTU and DTU Skylab do not require any formal documentation or receipts documenting how the award was used. However, for transparency between the team members and your potential partners, we would advise that you manage funds in a transparent manner. We strongly encourage you to use this acceleration award to maintain and develop your connection with your challenge representatives from the industry/city/organisation to your benefit.

Acceleration Award

Wrap-up & Communication

6 months after receiving the award the NGCA team will reach out to all teams that have won the acceleration award. At least one team member should share a short update on the use of the award. We encourage you to share a similar update with your NGCA challenge representative contact and the Next Gen alumni network. This can just be a few lines and a picture of your activity (with a prototype/in the field/at a training etc.).

Applying for transfer of the award
