Vidyasagar University

Midnapore, West Bengal
721102

4.3.4: Additional Information

👉 **Bandwidth of internet connection**

Details of Internet Bandwidth Available at the Institution:

Since 2012, the university has had a 1Gbps (1000Mbps) internet leased line provided through the NKN project. This connection serves as the primary internet link for both academic and administrative functions. Under this project, the central government covers 75% of the cost, while the university is responsible for the remaining 25% (see attached invoices). This internet link is utilized by all stakeholders, including research scholars, students, faculty, and other staff members. Additionally, it supports various audio-video communications within the campus and serves as a connection to different servers. The average bandwidth utilization of this link is between 60-70%, and it supports over 4000 users.
