## Internal Quality Assurance Cell

MIDNAPORE - 721102, WEST BENGAL, INDIA

**6.2.1- The institutional Strategic plan is effectively deployed. Describe one activity successfully implemented based on the strategic plan with details of deployment strategy, during the year in not more than 100 - 200 words**

:

### **Teaching-learning and evaluation**

Vidyasagar University imparts quality education to PG and Ph.D. The university strictly follows its academic calendar in all activities related to teaching-learning and evaluation of the students. This academic calendar is prepared well in advance and ensures compulsory class room teaching, tutorial, continuous internal assessment and End Semester Examination for each semester in a session.

### **Research and development**

Each department has its own RAC (Research Advisory Committee) that assesses the progress of research periodically.

- The faculty are encouraged to attend FDPs, Short Term Training Programmes, workshops, seminars, and conferences organized by different organizations.
- Faculties are involved in research and they participate and share research works at national and international forums.
- Faculties and research scholars publish research articles from national and international publication house
- Also, project proposals were submitted to different funding agencies.
- Publication of Departmental journal (UGC Care listed), newsletter, wall magazine, etc.

### **Strategy to implement Green Initiatives in the Campus:**

- With the help of NSS cell of the University, various activities were organized to have a plastic-free campus. The forest week was observed.
- Earth Day and Environment Day were observed by the University's Geography Department.
- The University has a convention of watering plants in the opening of each and every ceremony. The plants are duly planted in the campus once the ceremony is over.
- The entry of outside vehicles/automobiles into the University campus was restricted once in a week, so that the University would be free from air-pollution to a great extent.
- Protecting the natural water bodies in and around the University campus and proper maintenance of rain water harvesting system was done.

---

- Proper maintenance of waste management system and waste water recycling system help the campus to look neat, clean and provide a pleasant feeling.
- Certain pockets in the campus are marked for the feeding of dogs, birds and other creatures.
